

Husband's support is vital in the wife's mental well-being

1. Emotional Support:

- **Listen without judgment:**
Encourage open conversations and validate her feelings.
- **Reassure her:**
Remind her that she is doing her best and that postpartum depression is not her fault.
- **Be patient and understanding:**
Recovery takes time, and consistent support is essential.

2. Practical Assistance:

- **Help with household chores:**
Cooking, cleaning, and laundry can feel overwhelming.
- **Assist with baby care:**
Offer to feed, change, or soothe the baby so she can rest.
- **Ensure she gets enough sleep:**
Sleep deprivation worsens postpartum depression.
