

3. Encouraging Professional Help

- **Support therapy or counseling:**
Encourage her to seek professional help if needed.
- **Accompany her to doctor visits:**
Emotional support during medical appointments can be reassuring.
- **Monitor symptoms:**
If depression worsens, help her access medical care promptly.

4. Promoting Self-Care

- **Encourage relaxation:**
Help her find time for activities she enjoys, like reading or meditation.
- **Ensure proper nutrition:**
A balanced diet can improve mood and energy levels.
- **Encourage gentle exercise:**
Walking or yoga can boost mental well-being.

5. Building a Support System

- **Connect her with other mothers:**
Support groups can provide comfort and shared experiences.
- **Ensure social interaction:**
Isolation can worsen depression, so encourage visits from friends and family.
- **Be patient and understanding:**
Recovery takes time, and consistent support is essential.
